

# ESPID 2020 ORIGAMI

ESPID  
2020

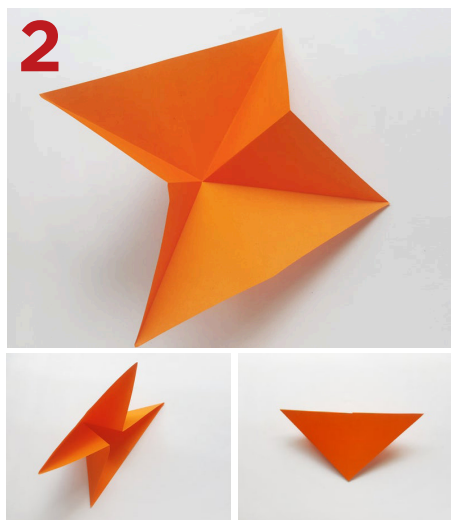

1

Cut out the orange square.

Make two folds right on the middle of the paper, horizontally and vertically.

Then rotate the paper and fold it diagonally right in the middle. Horizontally and vertically.

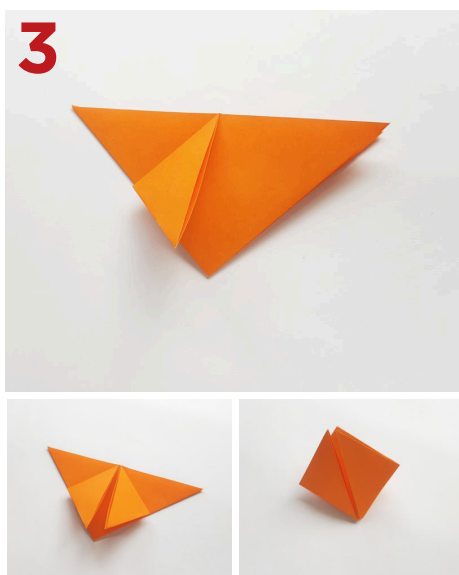

2

Hold the both left and right points of the paper and gently push them towards the center.

The paper will automatically fold according to the previous fold.

Then it'll take a triangular shape.

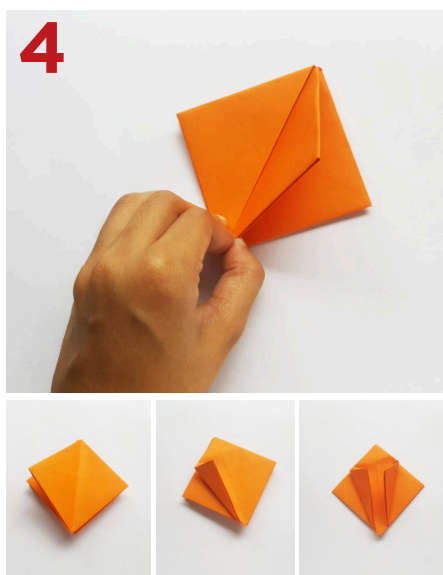

3

Fold the top left corner to the bottom point.

Similarly fold the top right corner to the bottom point.

Now flip the piece and do the same method on this side as well.

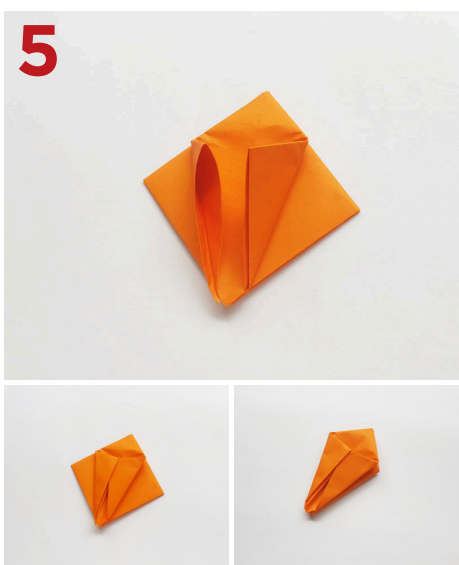

4

Fold the right side over the left side.

Also do this same method on the opposite side as well.

Now bring the left flap towards the center and fold it along the vertical crease on the middle.

Do the same on the right side.

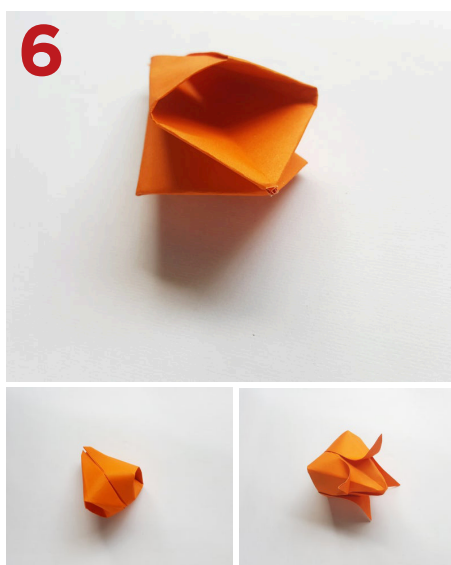

5

Open up the middle of the left flap.

Then insert the right flap into the middle of the left flap. You can glue it there to secure the fold.

Do the same on the other side as well.

6

Detect the hole on the bottom of the tulip.

Blow some air into that hole to inflate the flower to bring it to its shape.

Now from the top of the tulip spread the four petals to finish it up.
